VERSION 6.20

JANUARY 30, 2024

CMS PRO

UPGRADE MANUAL

PRESENTED BY: WOJOSCRIPTS

WOJOSCRIPTS.COM

Thank you for your purchase! If you have any questions that you feel should have been in this document, please log in using the account used to purchase the file and email via my user profile page contact form there. Thanks!

For questions on basic HTML, JavaScript or CSS editing - please give your question a quick Google or visit W3Schools as theme issues get top priority.

REQUIREMENTS

Please ensure your web host meets the application requirements. The lists of requirements are:

Web Server Requirements:

- Previous install of CMS Pro v5.8.

REQUIREMENTS

INSTALL

Make sure to backup your original database, and files. Update uses new css framework, which will affect all of your existing page layout, as well as front and admin side of cms pro.

It's strongly recommended to perform full install first, get familiar with it, and then upgrade if needed.

Using an FTP program (such as Filezilla, which is free, or a commercial package such as CuteFTP), login to your web server and copy all of the files except .htaccess, "setup", and "uploads" folder across into your existing CMS Pro directory. Some files will be overwritten, but that's perfectly fine.

Point your browser to /upgrade.php, and follow simple instructions.

WHATS NEW?

1. New framework, faster and secure
2. New Admin theme
3. New Master Front end theme, with over 100 reusable building blocks
4. Brand new page builder. More powerful, and easier to work with
5. Four language translation included EN, DE, NL, FR
6. New Cookie consent GDPR
7. New background local/youtube video plugin
8. One login form for front and admin panel
9. New duotone font icon set
10. Improved admin panel. Removed unused fonts/css and other assets
11. Works with PHP 8.2+
12. All know bugs are fixed.
